

CHARIOT

Shown With Options

The Chariot is designed to move key personnel around your facility quickly, quietly and efficiently. With PURE ELECTRIC power and an overall width that will fit through most standard doorways, your Chariot will take you everywhere you need to go.

The Chariot moves 3X faster than normal walking speed allowing you to cover more ground in less time.

A low center of gravity and the increased visibility of stand-up operation mean the Chariot is the safest way to move around an indoor or outdoor space.
